

# SATELLITE Freshwater LED

Flexible Strip Light

## Full-spectrum LEDs with wireless remote controlled color & effects.

### Install some wow

Introducing the ultimate retrofit. Now you can shift the color of your aquatic environment without shifting your body with the industry's first freshwater-optimized, full-spectrum (RGB+White), wireless remote controlled LED flexible strip light.

This ultra easy-to-install flexible strip light pairs super bright 6500K White LEDs with full-spectrum RGB LEDs to offer every color under the sun (and a few that aren't) controlled from a single 32-key customizable remote.

### Game-changing retrofit

The Satellite LED+ Flexible Strip Light features effects that you'll have to see to believe, plus each color is individually adjustable for endless custom color blends. Features include: 6, freshwater-optimized, color pre-sets, 12, dynamic effects including: cloud cover, fading lunar, storm, lightning, dusk and more, 4 memory buttons for saving custom color blends and pause/play each mode on-demand.

### Freshwater is cool again

Drawing on our years of expertise in both fresh and marine aquarium product development we have created another industry first – a full-spectrum, wireless remote controlled, customizable flexible strip light that was engineered from the ground up for freshwater aquarium environments. Making it the perfect choice for a beginner looking for a fast and easy way to dramatically improve their existing lighting set-up, or a seasoned veteran seeking a significant upgrade.

### Excitement installed in minutes

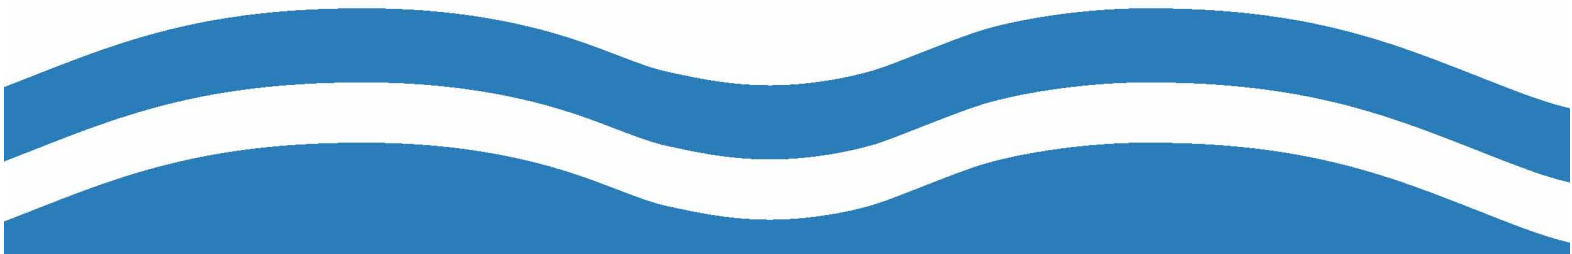

Simply unroll the strip light and cut to the appropriate length. Then, remove the adhesive backing and stick into place. We've also included clips and hardware for more custom installations.

### Low voltage, super safe LEDs

Low, 12V DC, IP65 rated LEDs making them super safe for aquarium use. (see chart on reverse side for specs)

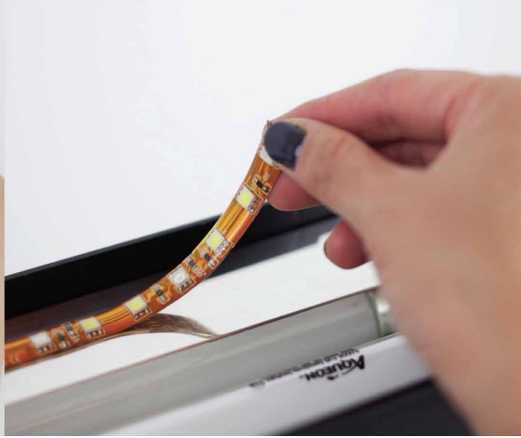

### Stay tuned!

Like what you see? You'll love our new line of marine-optimized products launching soon. Be the first to get all the details. Visit us at [www.current-usa.com](http://www.current-usa.com).
