Installation for Orbit IC, Orbit Marine LED, Satellite LED Plus & Satellite LED Plus PRO

**STEP 1**
Determine bracket mounting height to suspend fixture over aquarium.
Bottom Holes = Suspend fixture ~5" over tank
Middle Holes = Suspend fixture ~6" over tank
Top Holes = Suspend fixture ~7" over tank

*Tip:* Raising the light high will provide a wider spread but also decrease output by 10% per inch.

**STEP 2**
If mounting height needs adjusted, unscrew the back tank mount screws with a screwdriver (Phillips). Adjust bracket to the correct height and reassemble.

**STEP 3**
Loosen adjustment screws to fit over aquarium glass or frame. **DO NOT CUT YOUR FRAME.**

**STEP 4**
Place tank arm bracket in location and hand tighten screws to fasten the arm bracket to tank.

**DO NOT OVERTIGHTEN INNER BRACKET SCREWS**

**STEP 5**
Place light fixture clip with screw into slot of arm bracket, then tighten with turn nut. If two fixtures are being installed, use two clips per arm. Front-to-back position can be adjusted using turn nut and sliding light and clip to optimal position.

**STEP 6**
Slide light fixture into light clip and position fixture to optimal position. Route light cable behind tank arm mount and follow fixture instructions.

**Installation for Orbit Marine PRO**

**STEP 1**
Follow steps 1-3 above and adjust mounting bracket to correct height and install foot caps.

**STEP 2**
Remove the small bracket screws from the Orbit Marine PRO mounting brackets, bracket should slide freely from left to right.

**STEP 3**
Attach adjustable tank arm bracket to Orbit Marine PRO using Attachment screws. Screws should be installed through top of arm bracket slot and thread into either screw hole of fixture mounting brackets.

*NOTE:* Use 2 screws per fixture. If mounting a Dual Orbit Marine PRO, 4 screws total must be used.

**STEP 4**
Install any additional arms using same steps as above. Use a measuring tape and follow mounting guidelines, slide bracket into position.

**STEP 5**
Place lights with tank arm brackets into position on tank. Carefully adjust arms and fixture to the optimal location. Tighten arm screws and Attachment screws to fasten arm bracket with light to tank.
