MAIN LIGHTING EFFECTS

SUNRAYS - Slowly fades and dims white colors with a gentle fade between blue and purple, a great color spectrum for mornings and evenings.

ROLLING CLOUDS - Slowly dims all colors while rolling clouds horizontally across the aquascape. Popular for large aquariums.

STORM - Mimics a slowly approaching rain/thunderstorm with a few random lightning strikes.

GENTLE RAIN- Gently fades all colors to mimic passing cloud cover.

FLUORESCENCE - Slowly fades Blue to Green for enhancing any fluorescent ornaments or fish.

STARRY NIGHT - Fading blue lunar lighting accompanied with gentle on/off fades of individual white IC LED. Perfect for night.

BACKGROUND LIGHTING EFFECTS

Fade: DEEP BLUE to SUNSET ORANGE
Ideal for more creative, natural aquascapes
Think sunlight fading into deeper water depths.

ON/BRIGHTNESS/OFF - Background light controls. Press 1x for 50% intensity, 2x for 100% intensity, 3x to turn OFF.

Fade: DEEP BLUE to MOSS GREEN
A perfect blend to mimic deeper water depths.
It's calm, soothing and relaxing.

FADE: RGB - Slowly fades thru the entire RGB color spectrum. Press once to fade, press again to pause at a favorite color.

Fade: DEEP RED to DEEP ORANGE
Think life energy. Great for creating dramatic aquascapes and showing contrast.

CUSTOM COLOR - Saves your favorite color spectrum.

SOUND EFFECTS

STREAM - Listen to gentle ripples of water found at a streams edge combined with binaural alpha audio for focus, creativity and calming.

RAINSTORM - Hear the slow rumbles of an approaching thunderstorm with the patter of rain.

STARGAZE - Meditate or fall asleep to the relaxing sounds of gentle waves and binaural theta audio. Helps remove stress and let your mind escape.

FOREST- Listen and relax to gentle lake waves with the evening sounds of a surrounding rainforest.

24 HOUR TIMER PROGRAMS
